

# **Chambishi Copper Smelter Limited Smoothly Completing 2012 Annual Overhaul**

Chambishi Copper Smelter Limited (CCS), a Zambia-stationed enterprise of our company, smoothly completed its seven-days annual equipment overhaul upon production suspension from 24<sup>th</sup> to 30<sup>th</sup> October, 2012.

The overhaul completed 66 items concerning machinery, masonry, pipelines, boilers, electric engineering, and meters. Out Of these, 26 items were at smelting plant, 12 at sulfuric acid plant, 9 at oxygen workshop, 5 at water treatment workshop, and 14 at power plant. The smooth implementation of the overhaul was based on nearly ten months' preparations such as plan reporting, project discussion, purchase of spare parts and materials, project plan discussion, and human resources storage. The success of the overhaul is due to the efforts and close cooperation among the personnel of China 15MCC, field service personnel of equipment suppliers, and both the Chinese and Zambian employees of CCS. As

most items were completed by 28<sup>th</sup> October, the overhaul goals such as “putting safety first, regarding quality utmost, and keeping the schedule” have been attained, and also created a good condition for future production and operation.
