

## **A Delegation from the Ministry of Land and Resources Headed by Department Chief Liu Lianhe Paying an Investigating Visit to CNMC Luanshya**

On May 29, 2013 local time, a delegation from the Ministry of Land and Resources headed by Liu Lianhe, chief of the Mineral Development Management Department of the said Ministry, paid an investigating visit to CNMC Luanshya, one of CNMCL's enterprises in Zambia. Accompanied by LuoXingeng, executive director of CNMCL and president of CNMC Luanshya, chief Liu and his party listened to the report on the production and operation conditions of CNMC Luanshya. They also had field investigation at Muliashi open-pit mining area, wet-process smelting workshop, and heap leach field.

During the visit, Chief Liu fully affirmed the progress made by Muliashi Metal Leach Project. He holds that the open-pit mine is under orderly management and organization and has a massive production scale, that the electrodeposition workshop has reliable processing techniques and advanced production equipment, and that the feeding system of the hard rock building yard has first-rate equipment and is technically advanced. He

praises the nonferrous metal mining industry of China as the model of successful operation by Chinese enterprises in Zambia and even Africa. He encourages CNMC Luanshya to keep on working hard, achieve sound mine production and operation, and further build up a good image for overseas operation by central enterprises.
